I am so new to this please be patient. I am trying to send AT Commands to my Quectel EC25-AF. There are two towers down in my area on AT&T and I would like to block out those bands. I would like to scan band 12/17/4. I purchased a booster for band 4 and I see no improvement. Any help would be GREAT!

Quectel EC25 AT COMMANDS - LTE HACKS

This document gives details of the AT Command Set supported by Quectel NB-IoT BC66 module. By default, the module is in auto-baud mode. When powering on the module, the MCU has to send AT command consecutively to synchronize baud rate with the module until OK is returned. After successful

BC66 AT Commands Manual - Sisoog

In alarm mode, protocol stack and SIM protocol is closed, only a few AT command can be executed, and system will be powered down after 90 seconds if neither power key is pressed nor functionality is changed to full functionality. If power key is pressed, system will be powered down right now. Confidential Quectel.
