C 7 1 And Net

By default C# 7.0 was shipped With
Visual Studio 2017 and this is the major
release (March 2017) till now. In August
2017 a minor version of C# 7.0 was
released and version named as C# 7.1.
This minor version came with four new
features (async main, target-typed
default literals, tuple name inference,
and generic support for pattern-
matching) and some minor changes to
the what was introduced ...

Let's look at each of the new C# 7.1
features used in here. For a full overview
of the features in C# 7.1, check out the
docs. Async Main. The Main entry point
method can now return a Task or a
Task<int>. When it does, execution will
wait for the returned task to complete,
before shutting down the program.

C# 7.0 has been quickly enhanced with a couple of new features in 7.1 and 7.2. If you start Visual Studio 2017 and try e.g. the new "private protected" access modifier then the compiler may not accept it: It puts a red line under "private protected" saying that this access modifier combination is not...

C# 7.1 adds the ability to configure the compiler to match a specified version of the language. That enables you to separate the decision to upgrade tools from the decision to upgrade language versions. C# 7.1 adds the language version selection configuration element, three new language features, and new compiler behavior.

fleshed out.

Perusing C# 7.1

C# 7.1 adds a new target-typed default literal that provides a shortcut for the default(T) operator using type inference. In earlier versions of C#, to get the default value for a type, you had to specify the type explicitly. For example, default(int) returned 0. C# 7.1 allows you to drop the type and have it inferred automatically.
