The cheetah inhabits the African continent, more specifically in the central and southeast areas. It is one of the animals of the African savannah. The leopard is very adaptable and can thrive in a forest, jungle or rocky terrain. For that reason its territory extends from the African continent, where sometimes it shares habitat with cheetahs and lions, until the South of the Asian continent ...

Cheetah versus Leopard comparison chart: Cheetah Leopard: Introduction (from Wikipedia) The cheetah is a large feline inhabiting most of Africa and parts of the Middle East. It's the only extant member of the genus Acinonyx. The cheetah can run faster than any other land animal- as fast as 75 mph. Only cat with semi-retractable claws.

Cheetah vs Leopard - Difference and Comparison | Diffen

Cheetahs are revered by many for their perceived athleticism and grace. Since many also consider them to be "big cats," they are also seen as dangerous. Their height and spotted patterns make them seem similar in appearance to leopards and jaguars—big cats that are unquestionably dangerous to approach. However, in professional zoo settings ...

Watch: Cheetah walks into leopard in the Kruger [video]

The cheetah is significantly faster than the leopard. Cheetahs are the fastest land mammal in the world. A cheetah can accelerate from 0 to 103km/h in 3 seconds and can reach speed of up to 113km/h (70mph) in short burst. On the other hand, Leopard are not known for their speed, but they can accelerate and reach speeds up to 60km/h (37mph) over ...
