If you are looking for indie books, Bibliotastic provides you just that for free. This platform is for Indlio authors and they publish modern books. Though they are not so known publicly, the books range from romance, historical or mystery to science fiction that can be of your interest. The books are available to read online for free, however, you need to create an account with Bibliotastic in order to download a book. The site they say will be closed by the end of June 2016, so grab your favorite books as soon as possible.

Chevy Cobalt Sunroof Drains

There are four drains, they are located in the corners. I like to use compressed air to blow them out. I stick a plastic tube over a blow gun and push it in about six inches as to not blow the connection apart. Start with the air slowly, you should here it coming out the bottom.

Stopped Up Sunroof Drains

Check around the door seals and check the drains in the bottom of the doors. Check to see if the heater/AC housing drain to the engine compartment is clear. You may have water pooling in the heater housing due to debris fallen into the cowl vent plugging the drain. You could get under the dash with a flashlight to see where water is coming in.

Why is my 2008 Chevy Cobalt leaking water in the front ...

the sunroof drain pipes always get plugged, but another place to check would be remove your wiper arms and that cowl panel cover. under there is a drain slots to let the water from the cowl out. if leaves and shit get down there its only other route is through your internal ac filter into the passenger side

2010 Chevrolet Cobalt Parts - PartsGeek

If a vehicle with a bad sunroof motor must be left outside, the roof area should be covered with a tarp, or the sunroof should be sealed with a non-permeable membrane and a clear coat-safe tape. Even if some water penetrates under the tape, it will likely drain through the sunroof body drains instead of entering the interior of the vehicle.

Chevrolet Cobalt Sunroof Motor Replacement Cost Estimate

There are two drain tubes in the front of the sunroof that run the water down the corners to the ground and two drain tubes that drain water out the back corners. The water would seep around the glass, which is expected, but both of the tubes on the front of mine were plugged, and the water would overflow behind the dash and fill my floorboards.
