We're gonna do multiple criterion making decisions models, we'll do some spatial models and we'll do some decision theory under uncertainty. Okay, so that's sort of the outline. Now when we think about decision theory models, we're really doing these things for two reasons. First is normatively.

### Introduction to Decision Making - Aggregation & Decision ...

Decision theory (or the theory of choice not to be confused with choice theory) is the study of an agent's choices. Decision theory can be broken into two branches: normative decision theory, which analyzes the outcomes of decisions or determines the optimal decisions given constraints and assumptions, and descriptive decision theory, which analyzes how agents actually make the decisions they do. Decision theory is closely related to the field of game theory and is an interdisciplinary topic, st

Introduction  
A decision Tree consists of 3 types of nodes:-  
1. Decision nodes - commonly represented by squares  
2. Chance nodes - represented by circles  
3. End nodes - represented by triangles  
a decision tree has only burst nodes (splitting paths) but no sink nodes (converging paths).
