The new VXI-4 standard adds VME64x and VXS technology to the VXI architecture. VXI crates/mainframes and modules come in 2 form factors - C-size (6U x 340mm) or D-size (9U x 340mm). VXI uses the full 32-bit VME architecture, but adds lines for instrumentation signals to the outer P2 connector rows (VME: user defined) and to the P3 connector of the D-size backplane.
