Get up and running with Kubernetes. Build, deliver, and scale container-based applications faster with Kubernetes. Learn the basics of Kubernetes, then discover how to easily deploy and manage containers at scale with Kubernetes on Azure.

### The Kubernetes Bundle | Microsoft Azure

A Deployment provides declarative updates for Pods and ReplicaSets. You describe a desired state in a Deployment, and the Deployment Controller changes the actual state to the desired state at a controlled rate. You can define Deployments to create new ReplicaSets, or to remove existing Deployments and adopt all their resources with new Deployments. Note: Do not manage ReplicaSets owned by a ...
