selected for the strategic construction of their global and local semantic structures.

Cognitive Context Models and Discourse

A mental model is an explanation of someone's thought process about how something works in the real world. It is a representation of the surrounding world, the relationships between its various parts and a person's intuitive perception about his or her own acts and their consequences. Mental models can help shape behaviour and set an approach to solving problems and doing tasks. A mental model is a kind of internal symbol or representation of external reality, hypothesized to play a major role i

Mental Models in Discourse Processing and Reasoning ...

Models of discourse processing have attempted to describe when and how linguistic input and prior knowledge influence moment-by-moment processing during reading experiences.

Language/Discourse Comprehension and Understanding

The field of discourse processing investigates the structures, patterns, mental representations, and processes that underlie written and spoken discourse. It is a multidisciplinary field that includes psychology, rhetoric, sociolinguistics, conversation analysis, education, sociology, anthropology, computational linguistics, and computer science.

Discourse Processing In Children | Download eBook pdf ...

Abstract. In this article the relevance of a sociocognitive approach to discourse is shown by presenting a new theory of context, defined as subjective participants' constructs of communicative situations, and made explicit in terms of mental models - context models - in Episodic Memory. Through a 'contextual analysis' of a fragment of one of the 'Iraq' speeches by Tony Blair in the British House of Commons, it is shown how such context models control and explain many political ...
