Restful Microservices Java Develop a microservices-based RESTful Java application to Oracle Cloud Develop a Microservices-based RESTful Java Application Developing a microservice for the cloud today requires modern tools. This microservices example explores using the Helidon server along with Docker to make a cloud- ready application.

Restful Microservices Java - eufacobonito.com.br

Built from the ground-up for container-less, microservice architectures, RestExpress is the easiest way to create RESTful APIs in Java. RestExpress is an extremely lightweight, fast, REST engine and API for Java. RestExpress is a thin wrapper on Netty IO HTTP handling. RestExpress lets you create performant, stand-alone REST APIs rapidly.

Building a Microservices-based REST API with RestExpress ...

REST (Representational State Transfer) is an architectural style which provides some architectural constraints . If your API applies those constraint then you can call API as RESTful API. Conclusion

APIs ≠ Only REST - DZone Microservices

In this tutorial you will use the Lambda console to create a Lambda function, and an Amazon API Gateway endpoint to trigger that function. You will be able to call the endpoint with any method (GET , POST , PATCH , etc.) to trigger your Lambda function. When the endpoint is called, the entire request will be passed through to your Lambda function.
