Sheep Brain Dissection Guide Answers

The sheep brain is quite similar to the human brain except for proportion. The sheep has a smaller cerebrum. Also the sheep brain is oriented anterior to posterior whereas the human brain is superior to inferior. 1. The tough outer covering of the sheep brain is the dura mater, one of three meninges (membranes) that cover the brain. You will need to remove the dura mater to see most of the structures of the brain.

Slice through the brain along the center line, starting at the . cerebrum. and going down through the . cerebellum, spinal cord, medulla, and . pons. Separate the two halves (hemispheres

Lab: Sheep Brain Dissection

The sheep brain dissection helped us visualize the location of the major parts of the brain in relation to our brain. We learned that sheep brains are very similar to human brains, but the slight differences in our brains separate us as species. We were surprised at how easy it was to see everything and how applicable it is to our brain.
