## Technical Analysis Of Charts

Technical traders analyze price charts to attempt to predict price movement. The two primary variables for technical analysis are the time frames considered and the particular technical indicators that a trader chooses to utilize. The technical analysis time frames shown on charts range from one-minute to monthly, or even yearly, time spans.

## Technical Analysis - Beginner's Guide to Technical Charts

Instead, technical analysis can help investors anticipate what is “likely” to happen to prices over time. Technical analysis uses a wide variety of charts that show price over time. Technical analysis is applicable to stocks, indices, commodities, futures or any tradable instrument where the price is influenced by the forces of supply and demand.
